"Mathematics... possesses not only truth, but supreme beauty - a beauty cold and austere", * like that of a pure crystal, sublimely poetic in total perfection.

Writing an elegant proof of a beautiful theorem is the act of merging patterns of ideas in perfect harmony, teasing order out of chaos, like creating an abstract system of zero entropy.
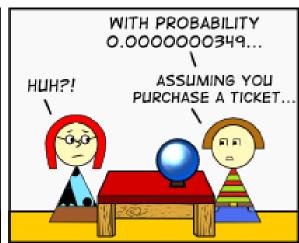

* Bertrand Russell

But of course it's not a closed system.

mmm...

$$(1 - \sqrt{x^2 + y^2})^2 + z^2 = \frac{1}{4}$$
